RunThru Sash Horns in Rehau

Ideal for window installations where a nostalgic touch is required

Fabricated from top quality PVCU profiles, the RunThru Sash Horn range of windows are simple to use and easy to Maintain. Meeting Part L of Building regulations and can be designed to meet Part B of fire escape (dependent on size).

These top hung windows with horns, create an attractive alternative to the traditional vertical sliding window. Instead of being screwed on as an addition to the sash, the RunThru horn is made by milling the profile into shape. The exposed end is capped with a matching colour cap.

Available in white both sides, Woodgrain foil both sides or Woodgrain foil on the outside. Woodgrain foils are Mahogany, Golden Oak or Rosewood.

Standard Specification

- 24mm float Pilks K units with silver/grey gaskets on white profiles, brown on mahogany or rosewood and acorn on golden oak.
- Internally beaded with sculptured beads.
- Locking handle operates shootbolt locking to casement openers.
- Locking handle operates concealed gearing to Tilt and Turn openers (only turns to 90°).
- White handles on white profiles and gold handles on woodgrain foiled profiles.
- 62mm profile to outerframe
- Casement sash 70mm sculptured to outer edge.
- Tilt and Turn sash 72mm

The Upper Sash

The top hung casement provides a convenient and ready source of ventilation. It can also be locked in a night ventilation position.

The Lower sash

The lower sash is a Tilt and Turn window. The top of the sash can be tilted slightly inwards for ventilation but it can also be turned 90° inwards for cleaning and, dependent upon size and position, be used for emergency escape meeting the demands of Part B of building regulations.

RunThru Horn

RunThru Horn over Tilt & Turn

The full Tilt and Turn with Dummy RunThru horns

This window was designed specifically for the householder who wanted top over fixed with RunThru horns, but actually had to have a 'fire escape' window. To match the top over fixed windows a tilt and turn sash was fitted with a dummy sash with horns. The result is a window that has ventilation under normal circumstances and the escape facility if the worst should happen.

Opens fully for fire escape and cleaning

Tilts for ventilation

White and woodgrains options available

Tilt & Turn with Dummy RunThru Horn

Slimline midrail gives authentic look to the impossible tilt and turn window

Can you tell the difference?

Which is top over fixed and which is tilt and turn?
